 Springer

## Overview

The upcoming (ICNDDNS-25) at Los Angeles, USA has been organized on 12th - 13th March 2025 and scheduled to alleviate this exact challenge by serving as a focal point for researchers in the discipline of International Conference on Neurodevelopmental Disorders and Neurological Surgery from the world over to gather together, learn from one another, impart and propagate their expertise, and put in place policies and mechanisms that will safeguard the steadfast growth and advancement of International Conference on Neurodevelopmental Disorders and Neurological Surgery. In addition, participants of this event will be privileged with numerous opportunities to ensure their own personal advancement - be it in their studies, research work, career, or entrepreneurial endeavors.

When it comes to research in any academic discipline, the underlying values of knowledge, professionalism, ethics, mutuality and stewardship, all remain the same. Today, more than ever, owing to the saturation of research projects and experimental studies being conducted on diverse topics all across the planet, and the stringent as well as convoluted nature of research funding and grant allocations, research professionals, scholars, scientists, and others are finding it pretty hard to cultivate and hone these values

## Who Should Attend

Anyone even remotely engaged in the field of Neurodevelopmental Disorders and Neurological Surgery knows and fully understands the need for keeping up with the latest research discoveries of scientists and researchers from all over the globe. Staying up-to-date with these developments is key to advancing one's own research and career. The quickest and easiest way to do this is to attend the (ICNDDNS-25) where -

Students      Educators      Research Scholars  
Scientists      Entrepreneurs      Industry Professionals, and  
Policymakers

in Neurodevelopmental Disorders and Neurological Surgery from all over the world will be gathered. If you're one of these individuals, you'll fit right in!
